

Turn social noise into revenue.

Conversational AI for Social Commerce

THE PROBLEM

There is no unified way to sell on social commerce

Social commerce is fragmented across several large and emerging platforms with no shared operating system for sellers. Every platform has its own storefronts, messaging, and workflows.

THE MARKET

Why This Matters

- Social commerce is the **fastest-growing consumer channel in history**, scaling toward \$22T by 2035.
- With no unified permission layer, sellers must manually operate each platform, making operational stacks **costly & headcount dependent**.
- Distribution is performance-gated — **incentivizing sellers to optimize single channels** instead of scaling multi-channel.

THE SOLUTION

GrowthSync

Conversational AI that turns every social interaction into a revenue opportunity. Every DM, comment, story mention, and live stream viewer becomes a personalized sales conversation, automatically.

DM Automation

Instant follow-ups with personalized offers. Context-aware product bundling and one-time checkout links.

Live Commerce

Auto-reply to live stream comments. Send checkout links via DM and capture leads in real-time.

Retention Engine

Reward story mentions instantly. Build VIP lists via DMs and gather zero-party data naturally.

+ The Intelligence Engine

The Segment of One.

GrowthSync builds a complete profile of every person who interacts with your brand. Every channel, every touchpoint. You don't talk to segments anymore. You talk to Jessica.
